

# LinearTechnik

Linear Motion and Assembly Technologies

To our valued customers,

On Monday 3 August the Victorian Government introduced new Stage 4 restrictions for businesses and industries. Based on the related documentation Linear Technik is categorized as 'OPEN (FOR ON-SITE WORK) - COVID SAFE PLAN' under the manufacturing sector.

In short, this means that Linear Technik will remain open to support essential and permitted business within Victoria with spares and consumables, after hours and workshop services where possible. For all of our interstate customers, it is business as usual.

To ensure we continue to support our customers, it is essential that our supply chain remains open with an appropriate and strong COVID SAFE PLAN in place. We are ensuring to secure support from our many suppliers to give you the same support that you expect from Linear Technik. We understand that our business is there to support yours.

As we enter this unprecedented period, we are also implementing a work from home plan for many of our staff according to the restrictions on our business to reduce our workforce by a 33% target. We anticipate that this will have only a minor impact to our day to day business, and as it may impact our ability to deliver our goods and services as per normal operations, we are working hard to keep this to the absolute minimum. If you have any questions or requests, please don't hesitate to contact us.

Thank you for your support during this challenging time.

Regards

**Karl Maier**  
General Manager  
Linear Technik Pty Ltd
