

LinearTechnik

Linear Motion and Assembly Technologies

Value-Added Distribution

Components are sourced from our principles and sold with or without modifications to our customers, depending on their requirements. In addition to trading and standard distribution, we also provide inventory management, warehousing, stock buffering, technical support and other value added services.

Our expertise in sourcing is one of our core capabilities that we capitalise upon to enhance our service offerings to our customers.

Committed to meet even the most stringent requirements, we will source from as many local and overseas markets as necessary to meet our customers demands. We are also able to source for product brands not reflected in our portfolio.

The most comprehensive range of brands available from a single source.

Your specialist supplier of
Linear Motion Products

LinearTechnik

Linear Motion and Assembly Technologies

With over 35 years of experience, Linear Technik has gained an enviable reputation as Australia's leading supplier of Linear Components.

- Expert Product Knowledge
- Huge Stock Holdings
- Fast Access to all Brands
- 24/7 Breakdown Service
- Same Day Despatch to all States on Stocked Products

Experience and expertise

A company is only as good as its people, at Linear Technik each member of our team is an important part of our ongoing commitment to exceptional service. Our personnel are as valuable to us as our products are to you. Each of our sales team averages over twenty years experience in linear motion technology and having travelled extensively both locally and overseas, our product and industry knowledge is second to none. Experience and expertise like that is hard to beat. We can fulfil your specific requirements with the best possible products from both a technical and economic standpoint. We can also source any other brand through our worldwide network of suppliers.
